Education

Purdue University – Master of Science in Engineering in Microelectronics and Semiconductors Present

Purdue University – Bachelor of Science in Computer Engineering Aug 2022

Relevant Coursework

MOS VLSI, Fund. of Current Flow, Flexible & Stretchable Electronics, Microprocessor Systems & Interfacing

Experience

Network Automation Engineer, Nsight – Green Bay, WI May 2023 – Oct 2023

- Developed tools to onboard Adtran devices, reducing 2-3 hours of manual work to 20 minutes
- Created offboard workflows to delete disconnected devices from database, GitLab, and NetBrain
- Deployed Rocky Linux to upgrade development Itential environment and migrate MongoDB data
- Designed an automated routine to update performance monitoring system to eliminate manual work
- Initiated Nautobot database to standardize with industry, allowing for smoother communication
- Started ChatOps bot for Microsoft Teams, enabling technicians to run workflows from mobile devices

Geek Squad Consultation Agent, Best Buy – Appleton, WI Nov 2022 – May 2023

- Worked one-on-one with clients to give personalized experience and aided to understand core issues
- Achieved highest survey response rate for individual performance in regional market
- Determined software and hardware issues to create effective repair plans

Undergraduate Researcher, Purdue University Dec 2020 – May 2021

- Created a continuous development workflow using Google Cloud Platform leading to faster testing
- Wrote a custom linter to standardize code resulting in more efficient code review

Advanced C Programming Teaching Assistant, Purdue University Aug 2020 – Dec 2020

- Held office hours to answer students' conceptual and technical questions and helped debug programs
- Participated in weekly meetings to optimize course instruction resulting in better content delivery

Projects

Tip Calculator Android App github.com/mister-rhee/tip-calculator

- Created a tip calculator app in Kotlin using Jetpack Compose that allows user text input for bill amount and variable tip percentage slider with optional switch for rounding up

Smart Mirror Design and Manufacture github.com/mister-rhee/looking-glass

- Designed a custom printed circuit board according to product specifications using KiCad
- Developed embedded software for ESP32, interfaced directly with the WiFi, Bluetooth Low Energy, and flash memory hardware using MicroPython and C++
- Authored extensive design documents outlining product specifications, technologies and resources

Etch-a-Sketch Webpage made with HTML, CSS, JS github.com/mister-rhee/etch-a-sketch

Dice Roller App written in Kotlin github.com/mister-rhee/dice-roller

Skills

Tools: TCAD (Silvaco, Cadence), Windows, Linux/UNIX, Android Studio, REST API, MongoDB, SQL, CI/CD

Languages: C/C++, Python, Java/Kotlin, Verilog, HTML, CSS, JavaScript, MATLAB

Fluent in Korean
